

Added AJAX in the Project

```
$.ajax({
  type: "POST",
  url: "/localhost/college",
  success: function(response)
  {
    data = response.data;
    write(data);
  }
});
```

Given a Demo on AJAX as well

```
<!DOCTYPE html>
<html>
  <head>
    <title>
      AJAX DEMO
    </title>
    <script src="http://ajax.googleapis.com/ajax/libs/jquery/1.7.1/jquery.min.js"
type="text/javascript"></script>
  </head>
  <body>
    <button onclick = "ajaxFunction()">Ajax</button>
    <p id="demo"></p>
    <form action="demo.php">
      <input type="submit" value="click">
    </form>
    <script>
      function ajaxFunction()
      {
        var ajax = new XMLHttpRequest();
        ajax.onreadystatechange = function()
        {
          if(this.readyState==4 && this.status == 200)
          {
            document.getElementById("demo").innerHTML =
(this.responseText);
          }
        }
        ajax.open("POST","test.txt", true);
        ajax.send();
      }
    </script>
  </body>
</html>
```
