

WEEK 3 - ADDED ASIDE TAG USING HTML ELEMENTS

```
<!DOCTYPE html>
<html>
<head>
<style>
aside {
  width: 30%;
  padding-left: 15px;
  margin-left: 15px;
  float: right;
  font-style: italic;
  background-color: lightgray;
}
</style>
</head>
<body>
```

```
<h1>The aside element - Styled with CSS</h1>
```

```
<aside>
```

```
<p>The biggest dilemma a student faces after qualifying an engineering entrance exam like JEE Main, JEE Advanced and any other state-level exam is which college they should target after qualifying the entrance exam. Although it is expected that a student who chooses to appear in a national-level entrance exam, for example JEE, should be well-aware of all those colleges or institutions which accept JEE scores while offering admission. Yet, it is important that the student takes into consideration all the factors before zeroing in onto the college which suits his needs.
```

This is where CollegeDekho's College Predictor comes to the fore. It uses a complex algorithm to determine the best options for a student based on the detailed input provided by him/her.

Before proceeding any further on how the college predictor tool helps the students in identifying the best colleges for them, it is imperative that the student must know all the peculiar details about CollegeDekho's College Predictor tool.</p>
