

Simple applications using JSP and AJAX

Design simple application for accessing the data using XML

```
<?xml version = "1.0" encoding = "UTF-8" standalone =  
"yes" ?>  
<!DOCTYPE address [  
    <!ELEMENT address (name,company,phone)>  
    <!ELEMENT name (#PCDATA)>  
    <!ELEMENT company (#PCDATA)>  
    <!ELEMENT phone (#PCDATA)>  
  
<address>  
    <name>XYZ</name>  
    <company>ABC</company>  
    <phone>(011) 123-4567</phone>  
</address>
```
